

eG Innovations Monitoring and Observability Drives Healthcare IT Success

End-to-end performance monitoring and auto-diagnosis of IT applications and infrastructure ensures great user experience and enables excellent patient care.

eG Enterprise is uniquely capable of addressing Healthcare IT needs:

-  Enhance user satisfaction and improve MTTR through rapid troubleshooting of IT issues in a single console.
-  Eliminate finger-pointing between teams. Immediately recognize whether it is a hardware, Java, database or VDI issue.
-  Improve operational efficiency. Reduce IT costs through AIOps-powered alerting and automatic root cause diagnosis.
-  Right-size and optimize your infrastructure using our advanced analytics capabilities. Capacity plan for long-term needs.

Get unmatched visibility and insights into the performance of key applications and services:

-  Proactively monitor Citrix, VMware, AVD and other digital workspaces by detecting issues before users complain.
-  Get visibility into every layer and every tier of application and infrastructure tiers from a single pane of glass.
-  Prove where the cause of issues lie using AIOps-based topology views for root-cause diagnostics.

-  84% of users said that eG Enterprise helped them avoid application performance outages by identifying problems before end users were affected.
-  83% of users saw value within the first month of installing eG Enterprise.
-  72% of users reported that eG Enterprise helped reduce the time to identify the root cause of application performance.

AIOps unified monitoring and observability for 500+ key application and infrastructure components including:

-  Digital Workspaces and DaaS including Citrix, AVD, Amazon WorkSpaces, VMware and more.
-  Virtualized and containerized environments.
-  Cost-effective APM for Java, .NET, PHP, Node.js and other common application stacks.
-  Database monitoring for all major databases on-prem and in cloud.
-  Comprehensive Network, Server, Storage, App Server, IIS, Cloud monitoring and more.
-  Office 365 monitoring including Outlook, MS Teams, SharePoint and more.
